1. Degrees and Diplomas

Degrees and Diplomas	Field	Institution	Dates
Post-Doctorate	Nursing	Trinity Western University & BC Ministry of Health Office of Patient-Centred Measurement	2020
PhD	Nursing	University of British Columbia	2020
Specialization certificate	Faculty of Education (Measurement, evaluation, and research methodology)	University of British Columbia	2017
MSN	Nursing	University of British Columbia	2014
BSN	Nursing	University of British Columbia	2012
BHK	Exercise Science	University of British Columbia	2010

Title of PhD Dissertation: The Utility of Atrial Fibrillation Clinical Registry Data in the Modelling of Change in Patient-Reported Outcomes

Co-Supervisors: Drs. Jennifer Baumbusch and Richard Sawatzky

Committee Members: Drs. Sandra Lauck and Pamela Ratner

Title of Master Thesis: Heterosexual Gender Relations and Fatherhood: Perceptions of New Fathers who Smoke

Supervisor: Dr. John Oliffe

Committee Members: Drs. Joan Bottorf and Leanne Currie

2. Positions Held Prior to Appointment at University of Victoria

University, Company or Organization	Rank or Title	Dates
University of Victoria	Assistant professor	01/2021-present
Trinity Western University	Research Associate	02/2020-09/2020
Trinity Western University	Research Assistant	09/2018-09/2020
Centre for Health Evaluation & Outcome Sciences	Research Affiliate	09/2018-09/2020
Cardiac Services BC	Intern Analyst	2016-2017
Langara College	Instructor (NURS4122: Research for Evidence-based Practice)	2016

University of British Columbia	Graduate Teaching Assistant (NURS 339 & 342: Critical Inquiry and Research in Nursing Practice I & II; NURS 505: Statistical Literacy in Nursing)	2013-2015
Vancouver General Hospital	Registered Nurse, Neuroscience Unit (Casual)	2012-2015
Royal Columbian Hospital	Registered Nurse, Acute Care for the Elderly Unit (Casual)	2012-2015
Vancouver General Hospital, Neuroscience Unit	Employed Student Nurse	2011-2012
University of British Columbia	Research Assistant	2010-2016

3. Major Field(s) of Scholarly or Professional Interest

My program of research lies at the cusp between methodology and implementation in practice to influence health system transformation. The overarching goal of my research is to integrate patient “voices” by evaluating the use of patient-reported outcomes (PROs) to support person-centred learning health systems in older adult populations. Person-centred learning health system involves “feeding back” information into the data collection, preparation and analysis steps so that the system learns and further improves its output – in effect seamlessly integrating PRO research and clinical practice. My research not only optimizes the ability of clinicians to use PROs to improve person-centred care but also raise awareness of older adults’ unique personal, social and structural needs. The eventual end goal of my research program is to have every person – who will at some point receive care as they age – be treated with dignity and respect so that everyone can live their life to their fullest potential. Meeting that lofty goal means creating and sustaining social structures and health systems that listen to and support diverse adult patients at their most vulnerable time.

I have a strong research background that focuses on methods in PROs and I bring clinical knowledge as a registered nurse with experience in the care of older adults, which speaks to and deeply informs my research interests. In my dissertation work, I modelled change in PROs and explored the analytical potential of “real-world” clinical registry linked with administrative health data. I also completed a certificate at the world-renowned Measurement, Evaluation and Research Methodology Program in UBC Faculty of Education, which prepares graduates to be methodological and measurement specialists. This rigorous research background provided a critical foundation for developing my facility with a range of methodological approaches (including machine learning). I completed my joint-postdoctoral training at Trinity Western University and the BC Ministry of Health’s Office of Patient-Centred Measurement (supported by the BC SUPPORT Unit) focused on validity evidence in the use of PROs for health system planning using the provincial health survey linked with administrative health data (mostly of older adults). The results of my work led to an invited webinar presentation to healthcare leaders in BC and the methods group at the BC Ministry of Health (a collection of diverse researchers who focus on economics, methodology and knowledge translation) that positioned me at the forefront of health system transformations through the use of PROs.
